

## **The Best Relaytion**

# P1 Relay

ISO 9001

1 pole telecom and signal relay, polarized, Through Hole Type (THT) or Surface Mount Technology (SMT),

Relay types: non-latching with 1 coil

latching with 1 coil

#### **Features**

- Directly triggerable with TTL standard modules such as ALS, HCT and ACT
- Slim line 13.5 x 7.85 mm, 0.531 x 0.309 inch
- Switching current 1 A
- 1 changeover contact (1 form C / SPDT)
- Bifurcated contacts
- Immersion cleanable
- High sensitivity results in low nominal power consumption 65 to 130 mW for non-latching 30 to 150 mW for latching
- Surge voltage resistance between contact and coil:
  - 2.5 kV (2 / 10 µsec) meets the Bellcore Requirement GR-1089
  - 1.5 kV (10 / 160 µsec) meets FCC Part 68

### Typical applications

- Automotive equipment CAN bus, imobilizer
- Office equipment
- Measurement and control equipment
- Medical equipment
- Safety equipment

### **Options**

 FCC version on request. Testing of open contacts with surge voltage in accordance with FCC 68.302 (1.5 kV, 10/160 µsec)

### **European Directive conformance:**

P1 relay product conformance according to:

- Directive 2000/53/EC: ELV (End of Life of Vehicles)
- Directive 2002/95/EC: ROHS (Restrictions of the use of certain hazardous substances in electrical and electronic equipment)

Compliance is evidenced by written declaration from all raw material suppliers.

Tyco Electronics AXICOM only has responsibility for the proper processing of these materials.

Confirmation is valid for date codes ≥ 0429

Basic insulation coil/contacts according to IEC/EN 60950

Clearance > 0.75 mm Creepage distance > 0.75 mm

All data refers to  $23\,^\circ$  C unless otherwise specified.

### Recommended soldering conditions

Soldering conditions according CECC 00802

Note: Internal relay termperature should not exceed  $2\,10^\circ$  C

Vapor Phase Soldering: Temperature/Time Profile (Lead Temperature)

Infrared Soldering: Temperature/Time Profile (Lead Temperature)

Packing Dimensions in mm

Tube for THT version - 40 relays per tube, 2000 relays per box

Tape and reel for SMT version - 480 relays per reel, 2400 per box

### Reel dimension

### **IM Relays**

 $4^{th}$  generation's lim line – low profile polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 1.5... 24 V, coil power consumption of 140... 200 mW, latching relays with 1 coil 100 mW. The IM relay is available as through hole and surface mount type (J-Legs and Gull Wings) and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills the Bellcore requirements according GR 1089 (2,5 kV - 2 / 10  $\mu$ s) and FCC part 68 (1,5 kV - 10 / 160  $\mu$ s). The IM relay is CECC/IECQ approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. 10 x 6 mm board space and 5.65 mm height.

### P2 Relays

 $3^{rd}$  generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V, coil power consumption 140 mW, latching relays with 1 coil 70 mW. The P2 Relay is available as through hole or surface mount type and capable to switch currents up to 5 A. Dielectric strength fulfills the Bellcore requirements according GR 1089 (2,5 kV  $^-$  2 / 10  $\mu$ s) and FCC part 68 (1,5 kV  $^-$  10 / 160  $\mu$ s). Dimensions approx. 15 x 7,5 mm board space and 10 mm height.

### **FX Relays**

 $3^{rd}$  generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 3 ... 48 V, coil power consumption of 80 ... 260 mW for the high sensitive version, 140... 300 mW for the standard version, latching relays with 1 coil 100 mW. The FX2 relay is available as through hole type and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills the Bellcore requirements according GR 1089 (2,5 kV  $^-$  2 / 10  $\mu$ s) and FCC part 68 (1,5 kV  $^-$  10 / 160  $\mu$ s). The FX2 is CECC/IECQ approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. 15 x 7,5 mm board space and 10,7 mm height.

### FT2 / FU2 Relavs

 $3^{rd}$  generation non polarized, non latching 2 c/o telecom relay with bifurcated contacts. Nominal voltage range from 3 ... 48 V, coil power consumption 200 ... 300 mW. Most sensitive 48 V relay. Available as through hole and surface mount type. Dielectric strength fulfills the Bellcore requirements according GR 1089 (2,5 kV - 2 / 10  $\mu s$ ) and FCC part 68 (1,5 kV - 10 / 160  $\mu s$ ). The FT2/FU2 is CECC/IECQ approved and certified in accordance with IEC/EN 60950 and UL1950. Dimensions approx. 15 x 7,5 mm board space and 10 mm height.

### FP2 Relays

 $3^{rd}$  generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 48 V, coil power consumption of 80 ... 260 mW for the high sensitive version, 140... 300 mW for the standard version, latching relays with 1 coil 100 mW.. The FP2 Relay is available as through hole type and capable to switch loads up to  $30\,\text{W}/62.5\,\text{VA}$ . Dielectric strength fulfills FCC part 68 (1,5 kV –  $10\,\text{/}\,160\,\mu\text{s}$ ). The FP2 is CECC/IECQ approved. Dimensions approx.  $14\,\text{x}\,9\,\text{mm}$  board space and 5 mm height.

### MT2 / MT4

 $2^{nd}$  generation non polarized, non latching 2 c/o and 4 c/o telecom and signal relay with bifurcated contacts. Nominal voltage range from 4.5 ... 48 V, coil power consumption 150/200/300/400 and 550 mW, and 300 mW (MT4). Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV - 10 / 160  $\mu s$ ) for both and the Bellcore requirements according GR 1089 (2,5 kV - 2 / 10  $\mu s$ ) the MT4 only

Dimensions MT2 approx.  $20 \times 10$  mm board space and 11 mm height, MT4 approx.  $20 \times 15$  mm board space and 11 mm height.

### D2n Relays

 $2^{nd}$  generation non polarized 2 c/o relay for telecom and various other applications. Nominal voltage range from 3 ... 48 V, coil power consumption from 150 .... 500 mW. The D2n relay is capable to switch currents up to 3 A. Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV - 10 / 160  $\mu s$ ). Dimensions approx. 20 x10 mm board space and 11,5 mm height.

### P1 Relays

Extremely sensitive, polarized 1 c/o relay with bifurcated contacts for a wide range of applications, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V, coil power consumption 65 mW, latching relays with 1 coil 30 mW. The P1 relay is available as through hole or surface mount type and capable to switch currents up to 1 A. Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV - 10 / 160  $\mu s$ ). Dimensions approx. 13 x 7,6 mm board space and 7 mm height for THT or 8 mm height for SMT version.

### W11 Relays

Low cost, non polarized 1 c/o relay for various applications. Nominal voltage range from 3 ... 24 V, coil power consumption 450 mW, sensitive versions 200 mW. The W11 relay is capable to switch currents up to 3 A. Dielectric strength 1000 Vrms. Dimensions approx. 15,6 x 10,6 mm board space and 11,5 mm height.

### Reed Relays

High sensitive, non polarized relay for telecom and various other applications, available with 1 n/o, 2 n/o or 1c/o contacts. Nominal voltage range from 5 ... 24 V, coil power consumption 50...280 mW for 1 n/o and 125 ... 280 mW for 2 n/o or 1 c/o versions. Reedrelays are available in DIP or SIL housing and capable to switch currents up to 0,5 A. Integrated diode and/or electrostatic shield optional. Dielectric strength 1500 Vdc. Dimensions approx. 19,3 x 7 mm board space and 5 ... 7,5 mm height for DIP or 19,8 x 5 mm board space and 7,8 mm height for SIL version.

#### Cradle Relays

Extremely reliable and mature relay family of 1st generation for various signal switching applications. Available as non polarized, polarized / latching and relay with AC coil. The benefit is the possibility of combining various contact sets from 1 up to 6 poles, single and bifurcated contacts, different contact materials with a coil voltage range from 1,5 Vdc to 220 Vac. Cradle relays are available as dust protected and hermetically sealed versions, with plug in or solder terminals and are capable to switch currents up to 5 A. Forcibly guided (linked) contact sets optional. Dielectric strength 500 Vrms. Dimensions from approx. 19 x 24 to 19x35 mm board space and 30 mm height.

### Other Relays

We offer a variety of different relay families for maintenance and replacement purposes. These relays are up to 60 years old now, such as Card Relay SN (V23030 / V23031 series), Small General Purpose Relay (V23006 series), Small Polarized Relay (V23063 ... V23067 and V23163 ... V23167 series). Accessories like sockets, hold down springs, etc. optional.

### **HF3 Relay**

High performance low cost RF relay with excellent RF characteristics. Available with an impedance of 50 and 75 Ohm. Suitable for frequencies up to 3 GHz. Actually smallest RF relay available combining small size, excellent RF performance and SMD solderability. Available as non latching or latching relay with 1 or 2 coils and a nominal coil voltage range from 3 ... 24 V, coil power consumption 140 mW, latching relays with 1 coil 70 mW. Dimensions  $14.6 \times 7.3 \times 10$  mm.
